IMSC27

International MedTech Safety Conference

29 June–2 July 2027

Trinity College Dublin
Dublin, Ireland

Patient safety at the center

Risk thinking across the lifecycle

IMSC27 brings together professionals who shape how medical technologies are developed, assessed, regulated, and used. Industry leaders, regulators, clinicians, academics, consultants, and technical experts come together around a shared goal: advancing patient and user safety.

4 days. 3 experiences.

1 community

1 — **29 June 2027** — In person
Tutorials & Workshops

2 — **30 June–1 July 2027** — In person + Online
Main Conference

3 — **2 July 2027** — In person
Conversations, Connections, Collaborations

Reasons to join

- Practical high-quality learning across the MedTech lifecycle
- Regulatory, industry, clinical, and academic perspectives
- Topics include risk management, AI/ML, cybersecurity, human factors, software, and combination products
- A volunteer-led, non-commercial technical forum centered on patient safety

Call for abstracts open

Five ways to contribute: presentations, tutorials/workshops, ignite ideas, guided roundtables, and digital posters.

www.medsafety.net/abstracts

IMSC26 welcomed **400+** participants from **160** organizations across **37** countries.
